Cyber Essentials including CE Plus

Guard against common security threats

Powered by

CERTIFICATION BODY
CYBER ESSENTIALS

Prevent over 80% of common cyber attacks while reassuring your customers that you're proactively defending your IT infrastructure and attracting new business with the guarantee of robust security measures.

As a **Cyber Essentials Certification Body**, we work with organisations throughout the certification, remediation, and revalidation process.

Our support covers:

- Auditing your infrastructure
- Advice on any required remediation
- Deployment of the necessary upgrades
- Certification as a Cyber Essentials PLUS business

Cyber Essentials provides five technical controls for an organisation to have in place within their IT systems:

User Access Control
Manage who can access company systems and monitor users' permission levels.

Secure Configuration
Configure device security to limit the possibility of a cybercriminal finding a way in.

Secure Update Management
Prevent hackers from using software flaws to gain access to your IT infrastructure.

Malware Protection
Detect and disarm viruses and malicious software before they cause harm to your assets.

Firewalls and Routers
Install a security filter between network devices and the internet to prevent unauthorised access.

Benefits of Cyber Essentials

Customer and Industry Recognition
Demonstrate to your clients, suppliers, and stakeholders that you are securing their data.

Baseline Your Security Infrastructure
Get a clear picture of your organisation's resilience to cybersecurity threats.

Protect your Organisation
Reduce the threat of common cyberattacks by implementing Cyber Essential's controls.

Improve your Brand
Get certified on the National Cyber Security Centre website.

Enhance your GDPR Status
Show that you have taken steps to protect sensitive data as required by GDPR regulations, industry compliance, and customer requirements.

Open New Sources of Revenue
Many government and private-sector tenders require suppliers to have Cyber Essentials accreditation.

For organisations:

- that are concerned about cyber threats
- needing to demonstrate their cyber security commitment to stakeholders
- bidding for private or government contracts that require Cyber Essentials/ CE Plus certifications
